**SECTION 4 FIRST AID MEASURES**

**Description of first aid measures:**

It is a severe irritant of the eyes, skin, nose and throat. Ingestion of large amounts is corrosive, and may result in circulatory collapse and death. Move out of dangerous area. Consult a physician. Show this safety data sheet to the doctor in attendance.

**If inhaled**

Irritating to nose, throat and respiratory tract. May cause coughing, sneezing and difficulty breathing. If breathed in, move person into fresh air. If not breathing, give humidified air. Consult a physician.

**In case of skin contact**

Brush off any loose material. Wash off with soap and plenty of water for at least 15 minutes. Consult a physician.

**In case of eye contact**

Rinse thoroughly with plenty of water for at least 15 minutes. Remove contact lenses if present and easy to do. Consult a physician.

**If swallowed**

Do NOT induce vomiting. Give water as tolerated. Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

**SECTION 5 FIRE FIGHTING MEASURES**

Flash Point: Non-combustible.  
Extinguishing Media: Suitable for surrounding fire.  
Auto Ignition Temp: Non-combustible.

Special Fire Fighting Procedures: If carbon dioxide is released, use an approved self-contained breathing apparatus.

Unusual Fire/Explosion Hazards: High temperatures due to fire or mixing with acids can cause this material to decompose releasing carbon dioxide gas.

Additional Information: If there is evidence that product decomposition has occurred, atmospheric tests should be run for carbon dioxide and oxygen content. Excessive quantities of carbon dioxide can cause suffocation of personnel in the immediate area.

**SECTION 6****ACCIDENTAL RELEASE MEASURES****Environmental Precautions:**

Avoid discharge into drains, water courses or onto the ground. Contact local authorities in case of spillage to drain/ aquatic environment.

**Containment and Cleaning:**

Reclaim and reuse as much as possible. Shovel up dry spills and place in sealable containers for recovery or disposal. Remainder of spill may normally be washed to the sewer providing environmental control limits are not affected. Avoid skin contact with wetted material.

**SECTION 7:****HANDLING AND STORAGE****Precautions to be taken for handling and storage:**

Wear appropriate protective equipment to prevent contact with skin and eyes. Control dust and mist generation. When diluting or preparing a solution, add to water in small amounts to avoid boiling and splattering. Label and close containers when not in use.

**Storage Procedures:**

Store in a cool, dry, well ventilated area in airtight containers. Material is hygroscopic and will absorb moisture and carbon dioxide from atmosphere. Area should have a caustic-resistant floor and approved drainage system. Store away from incompatible materials (potassium cyanate, boric acid). Reaction with acids may generate heat and carbon dioxide.

**SECTION 8:****EXPOSURE CONTROL/PERSONAL PROTECTION**

**Principal Component:** Potassium Carbonate

**Occupational Exposure Limits:**

Regulatory Limits:

Component	OSHA Final PEL TWA	OSHA Final PEL STEL	REL 8hr TWA
Inhalable Particulate	---	---	2 mg/m <sup>3</sup>

**Exposure Controls:**

Eye Protection:

Goggles where dust contact may be encountered.

Respiratory Protection:

A NIOSH-approved particulate respirator or dust filter mask should be worn if dust is present.

Other Protection:

Usually not required.

Ventilation Recommended:

Provide local exhaust ventilation where dust or mist may be generated.

**Skin and Body Protection:** Wear protective clothing to minimize skin contact. When potential for contact with dry material exists, wear disposable coveralls suitable for dust exposure, such as Tyvek. Contaminated clothing should be removed and laundered before reuse.

Stability:	Stable under normal conditions.
Conditions to avoid:	Cross contamination with other chemicals. Do not allow dust to blow freely into the environment. Material exposed to conditions of high moisture, or water, will form high pH sludges or liquids.
Incompatibility:	Magnesium, acids and excessive heat. Large quantities of CO <sub>2</sub> generated in an enclosed area will result in displacement of oxygen and may cause suffocation of personnel.
Hazardous decomposition products:	Carbon dioxide is generated when reacted with acids or exposed to high temperatures. When heated to decomposition, may emit toxic K <sub>2</sub> O fumes.
Polymerization:	Hazardous polymerization WILL NOT occur.

**SECTION 11: TOXICOLOGICAL INFORMATION**

**Information on likely routes of exposure:**

Ingestion:	Ingestion of this material may cause oral, esophageal, glottis redness, irritation, ulceration, edema, and stomach and intestinal irritation and burns. Ingesting large quantities may cause ulceration, vomiting, shock, and death.
------------	--

Inhalation: Inhalation of this material may cause upper airway irritation, cough, redness of mouth and upper airways..  
Skin contact: Causes skin redness/irritation.  
Eye contact: Eye exposure may cause severe irritation and redness to the eye lids, conjunctiva. Untreated, prolonged eye contact can cause permanent and severe eye damage..

**Information on toxicological effects:**

Acute toxicity: This material when applied to the skin of guinea pigs did not elicit any dermal sensitization reaction.  
IDLH: None  
Germ cell mutagenicity: No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.
