

ASHTA Chemicals publishes our new Safety Data Sheets for all products.

As a member of the American Chemistry Council, ASHTA is committed to early compliance with the Global Harmonization System. The newly published Safety Data Sheets (SDS) replace the older Material Safety Data Sheets (MSDS) with up to date and technically accurate information in a standardized worldwide format.

ASHTA Chemicals qualifies a Florida vendor for distribution of agricultural chemicals.

As a firm adherent to the Product Safety Code of the Responsible Care Management System, ASHTA Chemicals evaluates and qualifies each of the customers and distributors of those products that may have the potential to harm the public or the environment if misused or mishandled. Following a site inspection and program reviews, Winnfield Solutions was approved as a distributor for Agricultural pesticides and soil preparation chemicals.

Local Firefighters tour the ASHTABULA facility

Working as a partner to local emergency services through the Local Emergency Planning Commission (LEPC) ASHTA chemicals hosted each and every unit of the Ashtabula Township Fire Department over the last three weeks. The close working relationship and familiarization with the facility is a big help if a rapid response is needed during an emergency. This is also part of the company's commitment to assist in training local emergency responders.

The ASHTA work team hits 680,000 Safe work hours

Plant personnel and supporting contractors in the community have now worked over 680,000 man hours without a Lost Time Accident. Achieving these levels is impressive, but as the President, Brad Westfall, noted in the company wide town hall meeting this month, **“while we are proud of our safety record, our goal is not simply to achieve a new record. It is to adhere to our core values of providing a safe place for our employees to work and then to work safely every day.”**
