SECTION 4 FIRST AID MEASURES

Description of first aid measures:
Move out of dangerous area. Consult a physician. Show this safety data sheet to the doctor in attendance.

If inhaled:
If breathed in, move person into fresh air. If breathing is difficult, give oxygen (can only be given by a qualified person). Consult a physician.

In case of skin contact:
Rinse with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Consult a physician if irritation persists.

In case of eye contact:
Rinse thoroughly with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Consult a physician.

If swallowed:
Never give anything by mouth to an unconscious person. Give a glass of water. Do not induce vomiting unless directed to do so. Consult a physician.

Most important symptoms, effects, acute and delayed:
Irritation

Indication of immediate medical attention and special treatment needed:
No data available.

SECTION 5 FIRE FIGHTING MEASURES

Flash Point (Method): None.
Extinguishing Media: Suitable for surrounding fire.
Auto Ignition Temp: Non-combustible.

Special Fire Fighting Procedures: If carbon dioxide is released, use an approved self-contained breathing apparatus.

Unusual Fire/Explosion Hazards: Contact with combustible materials may cause fire and explosion.

Additional Information: If there is evidence of product decomposition, atmospheric tests should be run for carbon dioxide and oxygen content. Excessive quantities of carbon dioxide can cause suffocation of personnel in the immediate area. The product itself does not burn.

### SECTION 6  ACCIDENTAL RELEASE MEASURES

Environmental Precautions:
Avoid discharge into drains, water courses or onto the ground. Contact local authorities in case of spillage to drain/aquatic environment.

Containment and Cleaning:
Follow preplanned emergency procedures. Only properly equipped, trained, functional personnel should attempt to contain a leak. All other personnel should be evacuated from the danger area. Pick up and arrange disposal without creating dust. Sweep up and shovel to suitable, closed containers for disposal. Use personal protective equipment. Avoid dust formation. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust.

### SECTION 7  HANDLING AND STORAGE

Precautions to be taken for handling and storage:
Keep storage area separate from acids. Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Provide appropriate exhaust ventilation at places where dust is formed.

Precautions for repair:
Equipment: Only personnel trained and qualified in handling this product should prepare equipment for maintenance. Drain and rinse with water.

Other precautions: Do not permit personnel to handle this material without proper training and all necessary safety equipment.

Hygienic practices in handling and storage:
No unusual requirements.

### SECTION 8  EXPOSURE CONTROL/PERSONAL PROTECTION

Principal Component: Potassium Carbonate, Water

Exposure Controls:
Eye Protection: Goggles and face shield.
Respiratory Protection: Not required.
Other Protection: Protective clothing must be worn. Safety eye wash and shower station should be available in the handling area.
Ventilation Recommended: Not required.
Glove Type Recommended: Rubber or plastic.
Additional Information: Emergency eyewash and safety shower.

Appropriate Engineering Controls:
Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Hazardous Mixtures of Other Liquids, Solids or Gases:
The substance decomposes in flame or on a hot surface, forming carbon dioxide which can then displace oxygen.
